RE: 2026 Water Week Library

Dear Library Staff,

The AWWA Intermountain Section (AWWA-IMS) along with our Water Week Partners throughout Utah and Idaho, are happy to provide your library with materials to celebrate Water Week 2026 - the first full week in May. This year the celebration is from May 3rd thru May 9th and the theme is **"Unearth a Story"**. In this package, we have included a book and materials for interactive activity.

For further details please check out our website at IMS-AWWA - Water Week.

Library Packages

This year we are happy to once again provide libraries throughout Utah and Idaho with materials to help you celebrate Water Week with us. Our package of materials includes:

- **"Drop: An Adventure Through The Water Cycle" by Emily Kate Moon.** This is a Science Pals Book with a story about our friend "Drop" who is a water droplet flowing everywhere around Earth, even seeing dinosaurs and glaciers. It is focused on younger readers, ages 4 through 7, but has a wonderful story for readers of all ages!
- A series of **Activity Sheets** are included with this packet, including word search, coloring sheet, maze, crossword puzzle and a word scramble to get you working on water words.
- There is also a sheet with suggested activities to engage the children at the library or provided to take home.
- Two different passport activities are included to promote water interactions.

This year's program was developed by the Intermountain Section of AWWA, Public Relations and Education Committee.

Please follow us on LinkedIn (IMS-AWWA) and tag us in your social media posts using #IMSAWWA and #WaterWeek

Once again, we are excited that you will be helping us celebrate the world's most important resource, WATER!

Sincerely,

Lindsay Minck
