

WATER PROTECTORS IN THE FIELD

Water Drop - H2Joe

CENTRAL UTAH WATER
CONSERVANCY DISTRICT

H2Joe is a waterdrop who works at Central Utah Water Conservancy District. His primary job is to help make sure that clean, safe water gets delivered to those who need it.

H2Joe's favorite parts of his job are growing food, protecting threatened species and producing hydropower.

Being a water drop doesn't require any special education or training, but it does require you to be a polar molecule.

You can help H2Joe protect our water by taking good care of our watershed and conserving water at home.

A Day On The Job

- 5:30 AM** Wake up and evaporate
- 6:00 AM** Precipitate into a local reservoir
- 10:00 AM** Produce hydropower
- 11:30 AM** Break for lunch
- 12:00 PM** Head to the drinking water plant
- 5:00 PM** Deliver drinking water to the homes, parks, and libraries
- 7:00 PM** Grab a dinner
- 7:30 PM** Provide habitat to local fish
- 10:00 PM** Call it a day and rest in the lake
