

# ***WATER PROTECTORS IN THE FIELD***

**Education Director - Mary Closser**

Mary Closser is the education director at Recycle Utah. Her primary job is to empower people to live sustainable lives through education.

Mary's favorite part of the job teaching students that are excited about learning about how to treat the Earth better.

Being an education director at a recycle center requires a background in resource management. This background is gained by doing other environmental related jobs.

You can help Mary protect water by focusing on the first R (aka reduce) in the three R-cycle.
